## Skills - Programming Languages

Language: Swift, Objective-C, SQL, JSON, XML, HTML5, CSS

Frameworks/Libraries: CoreData, MapKit, Firebase, Alamofire, AFNetworking, Google API, Kitura

Other: REST, Cocoapods, Git/GitHub, Scrum/Agile\*, Build & Release Procedures, JIRA, MVC

## Education

iOS Developer Nanodegree Program at Udacity

Sep. 2016 - *present*

StartupFIU

Jan. 2017 - Apr. 2017

B.S. Information Technology at Florida International University

Aug. 2012 - May 2016

Minor: Social Media and E-marketing Analytics

## Project Experience

**On The Map** - ([Link](#)) Social Network application using Parse database to submit a student location using MapKit and portfolio's website.

**Movie App** - ([Link](#)) Created an iOS to search movies from the largest database using TheMovieDB API. Having a minimal interface, it display to the user any results that might return from a random query.

**Virtual Tourist** - ([Link](#)) The Virtual Tourist app downloads and stores images from Flickr using Core Data. The app allows users to drop pins on a map using the MapKit framework, as if they were stops on a tour.

## Work Experience

*IT Intern at Martin Digital Group, LLC.*

*Sunrise, U.S. | Jan. 2014 - Apr. 2015*

- Strengthen relationship with the clients by integrating my technical experience and expertise
- Fashioned a blog to look like a fitness site for moms and a subscription program.
- Checked logs and malfunctioning errors to avoid conflict with purchasing process on the website.
- Maintained the network, installation, and use of new software and process.

*Instructor at CoderDojo*

*Pembroke Pines, U.S. | Dec. 2014 - May 2016*

- Created stimulating lessons/games to an average of 20 students per session.
- Taught ongoing process and/or created new projects for beginners in a class of 20.
- Adapted sites like scratch.mit.edu and arduino.cc to motivate student's creativity through technology.
- Coached public speaking at the end of each session so young ones can acquire the skills on how to structure their ideas.

*iOS Developer Intern at YellowPepper*  
2017

*Miami, U.S. | Nov. 2016 - May*

- Worked with multiple iOS mobile banking projects developed with Objective-C and third-party frameworks.
- Contributed to daily standups with different teams around the world using the agile framework.
- Addressed client's concern regarding the app's privacy policy in the App Store.
- Developed, released, and debugged native iOS mobile banking apps created with Objective-C for LATAM.
