Skills - Programming Languages

Proficient

Swift	CoreData	MVC/VIPER	Swift Backend Server
Obj-C	Git/GitHub	Scrum/Agile*	Continuous Integration
SQL	RESTful API	Build & Release Procedures	

Training on:

Education

B.S. Information Technology at Florida International University

- August 2012 - May 2016

Minor: Social Media and E-marketing Analytics

iOS Developer Nanodegree Program at Udacity

- Sep 2016 - present

Project Experience

Passport App - Social Network application using Firebase as backend to store/retrieve profiles

Inventory Management - Created an iOS app to manage a database of items. Pros the effectiveness of adding a new item to the device database and reducing the time up to 97.5%

Virtual Tourist - The Virtual Tourist app downloads and stores images from Flickr using Core Data. The app allows users to drop pins on a map, as if they were stops on a tour.

Work Experience

iOS Developer Intern at YellowPepper - Miami, U.S.

| November 2016 - May 2017

- Worked with multiple iOS mobile banking projects developed with Objective-C and third-party frameworks.
- Contributed to daily standups with different teams around the world using the agile framework.
- Communicated with clients to discuss business goals.
- Developed, released, and debugged native iOS mobile banking apps created with Objective-C for LATAM.

Instructor at CoderDojo - Pembroke Pines, U.S. | Dec 2014 - May 2016

- Created stimulating lessons/games to an average of 20 students per session.
- Taught ongoing process and/or created new projects for beginners in a class of 20.
- Used sites like scratch.mit.edu and arduino.cc to motive creativity through technology.
- Encouraged public speaking at the end of each session so young ones can acquire the skills on how to structure their ideas.

IT Intern at Martin Digital Group, LLC. - Sunrise, U.S. | January 2014 - April 2015

- Worked with multiple clients as a consultant and technical support.
- Transformed a website from a blog to an ecommerce site
- Checked logs and malfunctioning errors to avoid conflict with purchasing process on the website.
- Maintained the network, installation, and use of new software and process.
